- 1. Claims 1, 3, 6, 7 and 11 are rejected under 35 USC 102(b) as being anticipated by the patent to Ohbayashi et al. (U.S.P. 6,492,005; see column 13, lines 57-62; column 14, lines 3 and 4; column 15, line 1-3; column 17, lines 64-67; column 19, lines 6-9, 56 and 57; and column 20, lines 63-67).
- 2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Ohbayashi et al.

Ohbayashi et al. teach an ink jet recording element comprising a support and an image receiving layer comprising alumina particles having their surfaces treated with a silane coupling agent having a hydrophilic, organic moiety. The experimental modification of this prior art in order to ascertain optimum operating conditions (e.g., determine compositional proportions, layer thicknesses and particle sizes) fails to render applicants; claims patentable in the absence of unexpected results.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of

Application/Control Number: 10/020,762

Art Unit: 1774

copending Application No. SN 10/021,227. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims constitute the obvious method of using the article claimed in S.N. 10/021,227.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
